

## MEETING ROOM DISPLAY

Savance EIOBoard Meeting Room Display is a digital signage system with optional touch screen capabilities.

It was designed to solve one simple, yet important, problem: conflicts with precious resources, like your conference rooms and other shared spaces. Simply walk up to a room, see the current availability, and reserve the room by following the on-screen guide.

Great for businesses, office hoteling, and more.

Make the most of your conference rooms and other shared workspaces by implementing Savance's easy-to-use electronic meeting room display system. View and reserve rooms on-the-spot (available in touch screen version), or from any PC, tablet, or smart phone.

Savance Meeting Room Display gives your business a professional look, increases efficiency, and optimizes your resources.

All the information you need is clearly displayed outside each conference room or other shared workspace. Detailed meeting information includes meeting title/topic and host, as well as the start and finish time for the meeting. Red and green screens show each room's status at a quick glance. View the future schedule of the room, and even reserve it with optional authentication. Rooms can also be reserved from any PC, tablet or smart phone.

By removing the confusion on what rooms are spoken for, you are allowing for a more organized and efficient workplace with fewer interruptions.
