

RESOURCE MANAGEMENT

Jerry Tibor

UNIVERSITY OF ALASKA ANCHORAGE

“ One of the best features has been the support. They are extremely knowledgeable, are always right on top of our requests, and are great about responding in a very timely manner.

David Sherrard

AMERICAN PACKAGING CORPORATION

“ Savance instilled a confidence that programming could be done in a timely manner to meet our unique needs.

Savance EIOBoard Resource Management is a scheduling and tracking system designed to allocate the use of all your company resources. The application can be used for allocating equipment and staff, for scheduling meetings and events, or even for tracking a piece of equipment down to room or staff member in real-time (with optional RTLS technology).

Inefficiency when it comes to asset tracking and resource management is not only an inconvenience for you and your coworkers, but also results in an overall decrease in productivity.

EIOBoard Resource Management simplifies the task of accounting for and allocating equipment and other resources by giving you a quick overview of each item’s status at any time, resulting in a more organized and efficient workplace. You will know:

- Who is using or is assigned to what;
- What is available;
- Where a piece of equipment is being held;
- What can be used for projects and meetings.

Thanks to EIOBoard’s easy-to-use Resource Manager and step-by-step wizard, reservations can be made straight from your desk or even a smartphone.

With optional RTLS technology, you can locate an asset with pinpoint accuracy. View the location in real-time, and easily sort information based on equipment type, department, date, and more.

SELECT BENEFITS

- Real-time tracking of assets down to team member or location.
- Customizable solution with optional RTLS technology.
- View and reserve rooms and equipment from any device, incl. PCs and smartphones
- Always know who is using or is assigned to what.
- Easy-to-use Resource Wizard guides you through the steps of setting up events, selecting contacts, and allocating resources.
