

VISITOR MANAGEMENT

Savance EIOBoard Visitor Management streamlines the visitor process for any business. Visitors can quickly sign in, either with the help of a receptionist or at a self-service touch screen kiosk. Ask any questions; show a safety video; print name tags; or allow for automatic information capture through ID scanning. The solution integrates with any access control system, as well as with EIOBoard Emergency Mustering.

It is critical to any organization to be able to centrally manage visitors from the time they check in to the time they leave. EIOBoard Visitor Management streamlines and automates the process, by letting you:

- Electronically sign visitors in and out;
- Print professional visitor passes or name tags;
- Notify host of arrival via text message, email, or pop-up;
- Provide complete reporting and audit trail data.

Using an automated self check-in kiosk, visitors can check themselves in by providing any information you require, or by scanning their driver's license, passport, or ID card. A label printer can be added to the solution for professional visitor nametags. Savance also integrates with any access control system, allowing you to provide temporary access cards as needed.

Once a visitor has been signed in, their information is automatically stored in a private, secure central database. This information can later be used to expedite the registration process for frequent visitors.

SELECT BENEFITS

- Centrally manage visitors from the time they check-in to the time they leave.
- Branded welcome screen for quick visitor, vendor, and contractor sign-in.
- Customize the process to collect important information during visitor sign-in, incl. photo and signature if needed.
- Expedite the registration process for frequent visitors; use a blacklist to prevent unwanted visits.
- Notify host via text message, email, or popup when a visitor has arrived.

David Sherrard

AMERICAN PACKAGING CORPORATION

“ In addition to savings in staff accountability, the process of accounting for visitors and contractors has also become more accurate and efficient.

Martin Rowland

SHERRITT INTERNATIONAL CORPORATION

“ I think it's really hit the nail on the head. It has accomplished everything we'd hoped for.
