# SAVANCE EIOBOARD Emergency Mustering

Savance's Electronic Emergency Mustering Solution in Use on Transocean's Discoverer Inspiration

## SIMPLE CHECK-IN METHODS

Instant sign-in at each lifeboat or other muster station by leveraging badge/wristband, barcode, or touch screen technology. Easy-to-use software interface.

## CUSTOM HARDWARE ARCHITECTURE

Hardware setup based on your situation, procedures, and vessel layout. Common components include weather-proof muster stations and large screen displays.

## REAL-TIME STATUS UPDATES

View muster point status updates in real-time, and automatically re-assign muster check-points based on last sign-in. Always know a person's last known location.

## Cost-Effective & Proven Electronic System to Increase Life Safety Offshore

Savance EIOBoard Emergency Mustering Offshore is a fully customizable electronic system for emergency preparedness and management, specifically geared towards offshore organizations, such as ships, oil rigs, and other vessels.

- Easily and accurately account for all individuals
- Faster, more reliable, and more efficient musters
- Ability to account for people who are not at their assigned muster point
- Real-time updates on all muster takers
- Improved emergency response time
- Greatly reduced risk of human error
- Available during power and network outages.

☎ (248) 478-2555

“ Unlike in the past, muster during drills is almost an afterthought. It occurs almost automatically, and I can focus my efforts and those of the bridge team on addressing the emergency.

*Captain Hargreaves, Discoverer Inspiration*
